EDUCATION

Technological University of the Philippines - Manila   *August 7, 2025*
Bachelor of Science in Information Systems(BSIS)

EXPERIENCE

Self-employed
Marvill Web Development
Intern Web Developer   *3 months*
- Designed websites using Tailwind CSS, PHP, and Laravel.
- Built and managed a ticket management system.
- Conducted QA testing for form submission, status updates, and role-based access control in various projects.

Completed multiple commissioned projects
BrewScape *– Html,Css,JavaScript, Local storage.*
- Created a coffee shop application with inventory management, cart functionality, and user authentication using JavaScript.

Student Grading System *– Python, Tkinter*
- Developed a CRUD-enabled desktop application to manage student records and calculate grade averages.
- Designed with a simple GUI using Tkinter for intuitive data entry, updates, and results display.

ATM *– C/C++*
- Developed an ATM simulation system demonstrating user account interactions and balance management.

PROJECTS

Gym Management *– MongoDB, React, Express, Nodejs*
- Built a full-stack web application for managing gym users, members, trainers, and subscriptions.
- Implemented CRUD operations with MongoDB for storing and updating user, member, membership-plans and trainer data.
- Designed role-based access (Admin,User,Member,Trainer) with Node.js/Express backend and React frontend.
- Enhanced user experience with SweetAlert notifications, Framer Motion animations, and Tailwind CSS for modern styling.

JallenShop *– React.js, Local Storage*
- Built a ReactJs e-commerce frontend with local storage to manage cart items and user data.
- Enhanced user experience with SweetAlert notifications, Tailwind Css and Framer motion Animations for smooth interactions.

Ticket Management System *– Laravel, PHP, MySQL, Mailtrap*
- A role-based web application for managing and tracking support tickets.
- Developed with user authentication and email verification using Mailtrap, ensuring secure access and account validation
- Designed role-specific functionalities for Users (submit tickets), Support (manage assigned tickets), and Admins (full control over users, tickets, and settings)

Dynamic Portfolio *– PHP, Laravel*
- Built a dynamic personal portfolio with CRUD functionality for projects and content management.
- Optimized for responsiveness and scalability with an integrated downloadable CV that auto-updates with portfolio content.

Coffee Shop Website *– React.js, Local Storage*
- Developed a fully responsive coffee shop website with interactive features. Using React, Html and CSS.
- Designed user-friendly layouts and optimized components for seamless navigation

Math Practice Application *– Html, Css, Bootstrap, Javascript*
- Design a responsive web application for practicing math operations: addition, subtraction, multiplication, and division.
- Enhanced user experience with intuitive design and responsive functionality

SKILLS

Programming Languages | DevTools

- ReactJs
- NodeJs
- Express

- Javascript
- MongoDB / MySQL
- PHP / Laravel

- Git / Github / Github Desktop
- Tailwind / Bootstrap
